

Stock tank specific recipes in both DRY & LIQUID formats  
**Clean, clear, commercially proven**

**Development Powder** 7 - 17 - 27

- Primary & Trace Minerals to accentuate Vegetative development
- Use in conjunction with FOUNDATION by Scietetics @ 1:1 ratio to achieve ideal EC value
- Fortified concentration of micronutrients for better quality growth

**Foundation Powder** 15 - 0 - 0

- Calcium and Magnesium
- Use with Development or Production for complete plant nutrition
- Stock or Batch tank flexibility

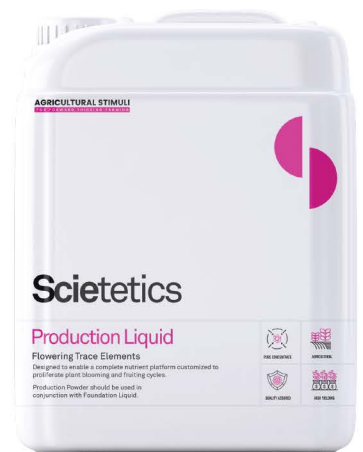

**Production Powder** 0 - 27 - 21

- Primary & Trace Minerals to accentuate Blooming & Fruiting production
- Use in conjunction with FOUNDATION by Scietetics @ 1:1 ratio to achieve ideal EC value
- Fortified concentration of micronutrients for higher quality yields

Tailored for commercial horticulture

**Specifically formulated for modern day irrigation strategies**

Choose a base according to your grow style, add the recommended bio-stimulant enhancements if desired, maintain 1.8-2.5 EC from **start-to-finish (veg-to-flower)**

**Development Liquid** 0-5-3.5

Liquid Suspension

- Primary and Trace Minerals to accentuate Vegetative development
- Use in conjunction with FOUNDATION by Scietetics @ 1:1 ratio to achieve ideal EC value
- Fortified concentration of micronutrients for better quality growth

**Foundation Liquid** 3-0-2

Liquid Suspension

- Calcium and Magnesium
- Use with Development or Production for complete plant nutrition
- Stock or Batch tank flexibility

**Production Liquid** 0-2-4

Liquid Suspension

- Primary & Trace Minerals to accentuate Blooming & Fruiting production
- Use in conjunction with FOUNDATION by Scietetics @ 1:1 ratio to achieve ideal EC value
- Fortified concentration of micronutrients for higher quality yield
